

Role: Beginning Bachelor Student

I am currently enrolled in the first year courses and am uncertain whether I should continue studying mathematics. Maybe studying an engineering subject would be better suited for me?

Role: Beginning Bachelor Student

My grades in linear algebra are rather poor while all my friends find the course pretty easy. Am I too stupid to study mathematics?

Role: Beginning Bachelor Student

I was always the best student in math in my high school class and now I am not even in the top third. I am so angry with myself and am very worried what my parents will say when they find out.

Role: Beginning Bachelor Student

Why should I already begin studying actively outside of class? In school, I was always able to just sit in class and listen carefully and then get good grades. I will just sit down and study hard before the exams.

Role: Beginning Bachelor Student

There is something I don't understand in Exercise 7 on my homework assignment. Could you please help me, I don't know who else to ask.

Role: Beginning Bachelor Student

I thought I could study during the daily commute in buses and trains, but I just can't focus. Should I try to move out from my parents' place and closer to the university? I'm not sure I can afford to pay for a room.

Role: Beginning Bachelor Student

I get frustrated studying alone. Back in highschool, I used to meet people in school and we exchanged notes, but I don't know anyone here and am just left to fend for myself.

Role: Beginning Bachelor Student

Math at the university is so much more difficult than in school. The homework assignments are so difficult, I don't understand anything. And I am so afraid of the exams. The TA says that the grade in the exam will also depend upon how the others perform. That is so unfair!
